**TEHNIAT MALIK**

This is my web task. It is very difficult to complete such task in given time constraint but I try my best to complete it. According to me for this task we have to store NFTS for which we need AWS services and API's. I used VS Code but we can use SAAS, React, WORDPRESS e.t.c. I also want to use hover on buttons and navigation but due to shortage of time I cant complete it.

Here are some code with output screenshots.

1. First of all, start with the main.html

2. After that first of all top banner navigation

```html
<!DOCTYPE html>
